

Novelty

DATEX – Entry Plate and Rear End Cover

protects entry sill panel and loading sill

Applications:

- Working in the front interior, especially installation and removal of seats
- Working in the luggage compartment, for example on the battery, entertainment electronics or hybrid technology
- Padded surface for working in an uncomfortable posture, e.g. leaning over the loading or entry sill

Functions:

- Protection against expensive dents, scratches and dirt
- Protection of the sill panel and the pillars even in the case of high point loads, e.g. when putting down the front seats during installation and removal
- Protects the edge of the luggage compartment and the bumper when moving heavy objects
- Padded support for the technician
- Optionally with imprint of your company logo or the manufacturer's logo

Fixation and Material:

- Made of blue, grey, red or black foam-coated artificial leather
- Three articulated sandwich pads guarantee the necessary strength
- Fibreglass rod holds the cover in its position
- Fixation of the lateral artificial leather flaps by Velcro straps
- Weight and articulated pads provide stable surface even without fixation

Dimensions and Weight:

- Size: about 152 x 78 cm
- Weight: about 2.0 kg
- Packaging: 1 piece

Datex O/N: D-U 13-12
