

# You are the carmaker's workshop!

Obviously this car couldn't be in better hands.  
Visualise your competitive edge.

**Special development for all  
European CHEVROLET models!**

DATEX protective covers – best possible protection, and more!

# No other tool does more than Datex covers to advertise your service

**This will convince your customers at first glance.**

Which tool could advertise your auto brand and the quality of your workshop more efficiently than our protective covers?

The use of professional protective covers makes your customers realize at first glance that you are committed to do quality work and to repair by the manufacturer's standards.

Perfect protection of the cars, the logo imprints and the authorized colours send a clear message: here is a quality leader at work.

You make it obvious to the customer that his car is in good hands.

# Optimum quality was achieved in many years of co-operation with workshops and carmakers

Each one of our covers is tailored to offer optimum protection for your customers' cars.

Only Datex develops, tests, produces, updates and improves each individual protective cover's fit, fixation, padding and optics – not only for each car brand, but, whenever necessary, even for single car models.

**Our covers thus comply with the quality and CI standards of most leading manufacturers and importers.**

Over the years, we have developed an efficient range of protective covers: as many as necessary and as few as possible; exactly as required by the authorised workshop.

This is the only way to guarantee

optimum protection in the face of an ever increasing multitude of car models.

**The use of our products saves avoidable damages and cost.**

Each protective cover has a skid-proof, scratch-free and quick fastening system, without magnets. It guarantees a secure fit on the car and avoids costly scratches which can be caused by magnets which nearly always have permanently adhering steel particles.

A two-centimetres thick padding reliably avoids dents and scratches even on delicate steel plate and plastic parts, which could easily be caused through negligence or errors in handling heavy

parts or tools.

The very vulnerable upper edges of the fenders are perfectly protected by an edge protection flap and the strong fastening system.

Nearly 40 years of Datex mean extensive know how in the co-operative development and first-class production of covers for the workshop's requirements.

Quality materials and careful craftsmanship guarantee the long service life of our protective covers.

**Made in Datteln, Germany.**

### Brand specific front cover for CHEVROLET

Tailored for all models. (O/N D-W 200-01)  
Made of grey foam-coated artificial leather.  
With white imprint of the CHEVROLET logo to support the workshop's image. Non-scratch attachment without magnets.  
Size: approx. 242 x 66 cm.

### Brand specific fender covers for CHEVROLET

Tailored for all models. (O/N D-W 200)  
Made of grey foam-coated artificial leather, with extra strong additional padding. With white imprint of the CHEVROLET logo to support the workshop's image.  
Non-scratch attachment without magnets.  
Size: approx. 113 x 73 cm.

Protects the entire bonnet during (O/N D-W 200-05)  
windscreen repairs. Made of grey foam-coated artificial leather.  
With white imprint of the CHEVROLET logo to support the workshop's image. Non-scratch attachment without magnets.  
Size: approx. 220 x 135 cm.

**Back seat bench cover for CHEVROLET** (O/N D-S 16 DW)

Made of strong grey artificial leather.  
With white imprint of the CHEVROLET logo to support the workshop's image. Simple and strong attachment by suction cups on a web belt.  
Size: approx. 150 cm x 145 cm.

**Seat cover for CHEVROLET** (O/N D-S 15 DW)

Made of strong grey artificial leather.  
All twin seams, strained seams are reinforced by artificial leather.  
With white imprint of the CHEVROLET logo to support the workshop's image. Washable at 30 °C.

**Wall bracket** (O/N D-H 99)

For clean and tidy storage of all DATEX fender, front, seat and fibreglass covers. Made of grey steel tube.  
Including mounting material.  
Total width: approx. 100 cm.

## First-class interior protection

Our products safeguard secure protection against damages and stains – even in very sensitive car interiors.

High class materials with workshop oriented properties efficiently guarantee protection in special applications. For example antistatic polyethylene, or anti-slip undersurfaces for seat covers.

Different colours signalise special properties and help to identify the right special cover.

Most of our interior protection products are available on a handy compact roll.

Our wall bracket allows clean, tidy and central storage of a great diversity of products.

### Tyre sacks made of polyethylene

excellent quality, polyethylene, white, thickness: 35 µ, 100 units per compact roll.

**size XXL:** 700 x 500 x 1190/1200 mm (O/N D-R 156)

**size XL:** 700 x 260 x 955/1000 mm (O/N D-R 155)

### Wall bracket for three compact rolls (O/N D-R 38)

creates clarity and accessibility, for all Datex compact rolls, sturdy, wall-mounted steel tube construction, including mounting material.

### Wall bracket for one compact roll (O/N D-R 37)

(without picture)

**Seat cover "antistatic"** (O/N D-E 3000)  
 protection of electronic devices against electrostatic discharge,  
 for all single seats,  
 made of extra strong polyethylene with antistatic material fractions,  
 yellow identification colour,  
 size: 840 x 1400 mm,  
 250 units on a compact roll.

**Seat cover "Optifit"** (O/N D-E 2000)  
 anti-slip bottom,  
 made of polyethylene, colour: white/blue,  
 size: 790 x 1330 mm,  
 500 units on a compact roll.

**Seat cover "Optifit deluxe"** (O/N D-E 2300)  
 extra strong, anti-slip bottom,  
 made of extra strong polyethylene, colour: white/silver,  
 size: 790 x 1330 mm,  
 300 units on a compact roll.

**Seat cover "Classic"** (O/N D-E 35)  
 made of polyethylene, colour: white,  
 size: 790 x 1300 mm,  
 500 units on a compact roll.

**Reusable steering wheel cover "antistatic"** (O/N D-L 3100)  
 protection of electronic devices against electrostatic discharge,  
 elasticated, for passenger cars and lorries,  
 made of extra strong polyethylene with antistatic material fractions,  
 yellow identification colour,  
 20 pieces per box.

**Reusable steering wheel cover** (O/N D-L 20)  
 elasticated, for passenger cars,  
 made of extra strong polyethylene,  
 colour: blue,  
 20 pieces per box.

**Disposable steering wheel cover** (O/N D-L 18)  
 for steering wheels of passenger cars and lorries,  
 polyethylene, very stretchable,  
 500 pieces per compact roll.

**Disposable steering wheel and gear shift cover** (O/N D-L 42)  
 for steering wheels of passenger cars and lorries,  
 adhesive polyethylene foil with handle,  
 for about 250 applications.

**Disposable cover for gear shift and handbrake**  
made of transparent polyethylene, (O/N D-SH 2020)  
size: 145 x 160 mm,  
500 units per box.

**Floor protection with footprint** (O/N D-T 95 F)  
made of white polyethylene with imprint, on a compact roll,  
size: 550 x 610 mm, 500 units per compact roll.

**Floor protection without imprint** (O/N D-T 95)  
(without picture) made of white polyethylene, on a compact roll,  
size: 550 x 610 mm, 500 units per compact roll.

**Floor protection, crepe paper** (O/N D-T 26)  
made of strong crepe paper,  
size: 370 x 500 mm,  
500 units per compact roll.

**Floor protection, crepe paper** (O/N D-T 27)  
made of strong crepe paper,  
size: 390 x 500 mm,  
500 units per box.

## Fibreglass covers for car body repairs

Our well-proven fibreglass covers reliably prevent damages by sparks and metal drops.

Individual protection is provided for each vehicle, according to type and extend of the grinding or welding work. This is guaranteed by six different sizes and shapes. On demand we will be glad to sew individual covers for your needs.

All our fibreglass covers are made of a robust fibreglass fabric with a special protective coating. This material can withstand temperatures up to 700 °C.

Special shapes and robust suction cups or belt straps allow a secure fixation on and inside the vehicle.

### Interior protection

The interior protection prevents sparks and metal drops from entering the interior. This cover is to be attached by suction cups.  
Size: 2.40 x 1.50 m

(O/N D-A 20)

### Tailored cover for roof and windows

This special cover protects the entire roof and the windows. Adjoining vehicles can be protected in the same way. Extra large, also for estate and fastback cars.  
Size : 4.40 x 2.60 m

(O/N D-A 25-01)

### Tailored rear cover

(O/N D-A 25-02)

This special cover protects the rear part of estate and fastback cars. It is to be fixed by slipping it over the back door and adjusting its width by web belts.

Size : 3.65 x 1.80 m

### Special windscreen cover

(O/N D-A 22)

This special windscreen cover protects the front and the rear screen. It is to be attached by suction cups.

Size : 1.00 x 2.00 m

### Special door cover

(O/N D-A 23)

The special door cover is tailored large enough to protect nearly all types of passenger car doors.

Size : 1.40 x 1.30 m

### Standard covers

The standard covers lend themselves to many types of application during grinding and welding work.

Size : 2,00 x 2,00 m

(O/N D-A 21)

Size : 3,00 x 2,00 m

(O/N D-A 21 XL)
